

Name:_____

Eeny Meeny Miny Mo, Where Does This Dinosaur Bone Go?

This is a drawing of a dinosaur bone. What dinosaur do you think it came from? What part of the dinosaur’s body did it come from? What did this bone do?

When scientists try to figure out how a dinosaur’s bones go together, it’s like a puzzle. This project is like a puzzle too. Think about where this bone would fit inside a dinosaur. Use your imagination! Then draw the rest of the dinosaur around the bone. Did this bone come from the head, body, arms, legs, or tail of the dinosaur? Or somewhere else? Did the dinosaur use it to move, or hold up its body, or fight, or something else? Color in your drawing and make it look great!

You can turn the paper over and try another bone when you’re done!

My bone belongs to this kind of dinosaur: _____.

My bone goes in this part of the dinosaur’s body: _____.

The dinosaur uses my bone to: _____.
